Please Note:

ADOA makes a continuous effort to keep prescription medication benefits affordable to members by evaluating our formulary with respect to how effective a medication is to treat a certain condition, and the cost of similar medications to treat the same condition. Formulary decisions are based on this information and ongoing evaluation. Below are specific formulary exclusions:

- Prescription medications that have over-the-counter (OTC) equivalents are not a covered prescription benefit. As new products with their active ingredients are made available OTC, they will automatically be excluded from the formulary.

- The pharmacy benefit coverage excludes the pharmacy products listed below. This list is not all-inclusive and is subject to change

  - Several non-sedating antihistamine products over-the-counter without prescription
  - all prescription medications in the therapeutic class of non-sedating antihistamines and their combinations
